INTERAVIA

Aeronautics • Astronautics • Electronics

Contents for Year 1966

MAIN ITEMS

No. 1 **Test Pilots Report on New Aircraft**
USAF Systems Command
Concorde Progress Report

No. 2 **Gemini Space Rendezvous**
Deutsche Lufthansa—a Decade of Reconstruction
Civil Aviation Com/Nav Equipment Survey

No. 3 **Regional Air Services in Europe**
The Swedish Electronics Industry
Civil Aviation Com/Nav Equipment Survey—II

No. 4 **Two Decades of Aviation Development**
The North Atlantic: Air Transport's First Objective
Growth of the US Aerospace Industry

No. 5 **Aviation and Space Programmes in Europe**
Variants of the McDonnell Phantom 2
Military Uses for Hovercraft
Supplement: International Defense Review

No. 6 **Airports for Tomorrow's Air Transport**
Japan's Aviation and Space Industry
Satellite Communications Systems

No. 7 **A New Generation of Fan Engines**
The German Air Show 1966
Reliability Problems in Microelectronics

No. 8 **The Supersonic Transports take Shape**
Mirage joins the Swiss Air Force
European Radar Equipment

No. 9 **The British Aerospace Industry**
Air Charter and the Tourist
Comsat Ground Stations

No. 10 **US Saturn/Apollo Moon Programme**
IATA today and tomorrow

No. 11 **The 25th SBAC Show in Retrospect**
Saturn/Apollo Electronics
Supplement: International Defense Review

No. 12 **The American Supersonic Transport: Lockheed or Boeing?**
US Military Airlift Command
The Douglas DC-8 Sixty Series

CONTENTS FOR YEAR 1966

1. International Organisations

ICAO's Fourth Air Navigation Conference: 1/67
The fifth EUM regional air navigation conference —M. Agesilas: 4/432
IATA Faces a Big Future: 10/1503

2. Defence and Political

Competition in Space: 1/47
State of the Union 1966—The President estimates . . .: 2/148
Facing up to Facts: 2/165
Technology versus Tactics: 3/301
The British Defence Review: 4/433
Space Activity in the German Federal Republic: 5/691
France Provides 2,000 million Francs for Space: 5/699
Time of Decision: 8/1155
Anglo-French Co-operation—R. Lucien: 11/1699
A Choice of Futures: 12/1875

3. Civil Aviation

Rebuilding an Airline—Profile of Deutsche Lufthansa: 2/174
Soviet Polar Aviation: 2/194
ATAs 1965 Engineering and Maintenance Conference: 2/217
Local Service Airlines—America's example shows Europe's need: 3/302
Aircraft for Local Services: 3/306
Air Inter—the French domestic airline—P. Hebrard: 3/310
Air Alpes—Local Service in the Mountains—K. Höhle: 3/312
Problems of local air services—H. Hermsen: 3/314
Twenty years of achievement on the North Atlantic—W. M. Masland: 4/466
Forest Fire Control—with the Canadair CL-215: 5/748
$75,000 insurance for airline passengers: 6/820
Tomorrow it must be easier: 6/856
A Force in Pakistan's Economic Development—M. Nibloe: 8/1183
General Aviation in Sweden: 8/1192
A Canadian Flying Weekend—M. Chorley: 8/1194
Limitations of VFR Business Flying—G. Landrock: 8/1196
The Charter Business: 9/1334
Charter Operations—A Danger for IATA Carriers?: 9/1335
West Germany's IT Organisers: 9/1336
Charter Operations in West Germany—K. Höhle: 9/1339
Südflug—Success from Packaged Holidays: J. M. Rieck: 9/1342
IATA Faces a Big Future: 10/1503
Pillars of World Air Transport: 10/1505
Britain's Airlines fight for Inclusive Tour business: 10/1527
Globe Air maps its own course—K. Höhle: 10/1531
No basic decisions in Honolulu—IATA plays it safe: 11/1700
US Supplemental Carriers on Brink of Major Expansion: 11/1788

IATA Airlines Scheduled Traffic—Year 1965: 11/1799

BALPA's 1966 Technical Symposium: 12/1838

IATA's 22nd AGM: 12/1855

Cutting the Cost of Air Transport: 12/1933

4. Service Aviation

The US Air Force Systems Command: 1/58

Firebrigade Mk.2 in Den Helder—D. Wood: 1/78

An Integrated Air Defence System for Saudi Arabia: 2/180

Nike-X or Never?: 2/185

Technology versus Tactics: 3/301

Britain's Air Forces and Industry—D. Wood: 5/705

NORAD—A Picture Report on the New Headquarters of the North American Air Defense Command: 5/746

Future Military Use of Hovercraft—A. W. Buzzard: 5/750

The Swiss Air Force introduces the Mirage: 8/1188

U.S. Military Airlift: 12/1876

Airlift Cargo Handling: 12/1881

5. Aircraft

a) **Civil Aircraft**

Concorde—From Project to Prototype: 1/48

The Air Conditioning System for the Concorde—H. W. Groves, D. J. Masters: 1/63

U.S. Light Twins for 1966: 1/98

A Short-haul Jet Enters Service: Operators Comment on the BAC One-Eleven: 2/172

The DC-8 Super 61 Awaits its Maiden Flight: 3/282A

Aircraft for Local Services: 3/306

The BN-2 Islander utility aircraft: 3/316

Boeing Announces the 747: 5/666

VFW Presses On With Project 614: 5/708

Progress with Concorde . . .: 5/773

Mitsubishi MU-2—A Modern Executive Aircraft From Japan: 6/932

Boeing Plans 747 Production: 6/935

New European aircraft projects: 7/1016

The Fairchild-Hiller FH-227B: 7/1036

Lear Liner Model 40: 7/1038

Time of Decision: 8/1155

The Lockheed L-2000-7: 8/1156

Boeing presents a new SST design: 8/1160

Supersonic Transport Airworthiness Standards: 8/1162

Progress with the Concorde Project: 8/1167

Concorde—Navigation and Operations: 8/1169

More on the Boeing 747: 8/1198

Growth in the Boeing 737: 10/1533

VC400—A German VTOL Transport Project: 10/1556

The Handley Page Jetstream: 11/1759

Series 60 DC-8s—Flexibility in Fleet Expansion: 12/1891

The Lockheed Double-Delta Design: 12/1900

The Boeing Swing-Wing SST: 12/1904

b) **Military Aircraft**

The Corsair 2 Programme Accelerates: 1/89

Developing a Multi-mission Aircraft: 2/166

Hueycobra—Forerunner of the AAFSS Armed Helicopter: 2/170

The Mohawk Surveillance System: 3/338

A Rotor/Wing High Speed VTOL Aircraft: 3/368

Milestones in Military Aircraft Development 1946-1966: 4/455

The Changing Role of Fighter Aircraft: 4/494

More Power for the Skyhawk: 4/497

The Light Fighter for European Defence: 5/735

The Development of the McDonnell Phantom: 5/737

The Dornier Do 31E: 6/928

New European aircraft projects: 7/1016

The Swiss Air Force introduces the Mirage: 8/1188

The Transall goes into production: 9/1344

The P.1127 goes into production: 11/1794

Sud-Aviation SA.340 Light Helicopter: 11/1802

The Viggen keeps to Schedule: 12/1920

6. Guided missiles and rockets

Sweden's Missile Test Range: 1/92

Recoverable High-Altitude Research Rockets from Dornier: 1/97

Nike-X or Never?: 2/185

Soviet Missile Inventory—II: 2/188

Hammaguir—French Missile Range in the Sahara: 4/524

Guided missile developments . . .: 7/1020

Tactical missiles for multiple missions: 11/1733

For high-altitude research: 11/1793

Rocket and Satellite Launches: 12/1856

7. Powerplants

Scramjet—A Supersonic Combustion Ramjet: 2/227

The Twenty Completed Years and the Twenty to Come—F. R. Banks: 4/470

Aero engines at the Show: 7/1018

Powerplants for the Giant Jets—the new 40,000 lb. thrust class: 7/1031

Rolls-Royce offers the 3-shaft RB.178: 7/1031

The Pratt & Whitney JT9D-1 Turbofan: 7/1033

New aircraft projects . . . and engine developments (Farnborough 1966): 11/1732

Progress in Turbofan Development: 12/1896

8. Electronics

ICAO's Fourth Air Navigation Conference: 1/67

Research and Production News: 1/73, 2/220, 3/336, 5/742, 8/1204, 9/1376

A New Concept in Microelectronics—P. A. Barnet: 1/77

Firebrigade Mk.2 in Den Helder—D. Wood: 1/78

An Integrated Air Defence System for Saudi Arabia: 2/180

Loran D—A Tactical Navigation Aid: 2/222

The Airborne Com/Nav Equipment Market: 2/229

The Swedish Electronics Industry—D. Ebert: 3/329

Radar Looks at the Universe: 3/335

The Mohawk Surveillance System: 3/338

The Airborne Com/Nav Equipment Market Part 2: 3/376

The fifth EUM regional air navigation conference—M. Agésilas: 4/432

Trends in Radar Since 1945—G. D. Speake: 4/490

NORAD—A Picture Report on the New Headquarters of the North American Air Defense Command: 5/746

ComSat Corporation—A Brighter Future—H. T. Simmons: 6/895

NASA Evaluates Satellite Communications Technology: 6/899

Apollo Communications Support: 6/902

Aerospace Electronics: 7/1024

Microelectronics—A Need for New Sophistication in Reliability and Producibility—G. V. Browning: 7/1080

Microelectronics in Airborne Equipment—F. D. Hoyle: 7/1083

KNL—Teldix's Combined Navigation and Landing System: 7/1085

TRW's Global Communications Satellite for Intelsat: 7/1086

Concorde—Navigation and Operations: 8/1169

European Radar Catalogue: 8/1209

British Digital Equipment for Future Automated Aircraft: 9/1310

Intelsat Ground Stations: 9/1372

Flight Recorders for Maintenance and Accident Investigation: 10/1560

Airborne Recording Systems: 10/1564

Justified Optimism—Electronics at Farnborough: 11/1735

Flight Electronics for Saturn and Apollo: 11/1761

Design Philosophy of the STAN 37/38 Category III—F. G. Fernau: 12/1924

The Role of Fluorocarbons in Airborne Wiring and Electronic Circuitry—A. J. Papayoannou: 12/1938

9. Astronautics

Space News in Brief: 1/29, 2/226, 4/431, 6/837, 8/1137, 9/1399, 10/1461

Competition in Space: 1/47

France's A.1 and FR.1 in orbit: 1/68

Halfway Point for the Apollo Programme: 1/94

Rendezvous in Space: 2/190

Space Science and Technology: 2/192, 3/362, 9/1368

Luna 9's Soft Landing: 3/283

Successful launch of D.1A: 3/283A

Gemini Orbital Rendezvous: 3/357

Saturn 1B Testing Begins: 3/361

Germany's part in the ELDO programme: 3/364

Hammaguir—French Missile Range in the Sahara: 4/524

The French D-1A Satellite: 4/527

The Northrop HL-10 Lifting Body: 4/529

Luna 10—First Moon Satellite: 5/665

Space Activity in the German Federal Republic: 5/691

France Provides 2,000 million Francs for Space: 5/699

French Satellite Launcher Vehicles: 5/702

Italian Industry and Space Research: 5/703

Gemini GT-8 docks with Agena: 5/781

ComSat Corporation—A Brighter Future—H. T. Simmons: 6/895

NASA Evaluates Satellite Communications Technology: 6/899

Apollo Communications Support: 6/902

Japan in Space: 6/909

Gateway to the Moon—Apollo Space Centre at Cape Kennedy: 6/924

Surveyor 1 and Gemini GT-9: 7/993

Guided missile developments and space research: 7/1020

TRW's Global Communications Satellite for Intelsat: 7/1086

The Saturn SA-203 Test: 8/1138

Surveyor 1 in action again: 8/1213

New French booster vehicle projects: 8/1214

Gemini GT-10: Double Rendezvous in Space: 9/1263

Lunar Orbiter 1: 9/1264

Intelsat Ground Stations: 9/1372

Gemini GT-11: Docked in the first orbit: 10/1460

Into Space—and why—M. Seamans: 10/1479

Saturn 5—A Booster of Superlatives: 10/1480

Key to Lunar Mission Success: The Apollo Spacecraft: 10/1484

Landing on the Moon: 10/1490
Apollo Spacesuits: 10/1494
Recent Satellites: 11/1701
Madrid: The 17th IAF Congress: 11/1702
Flight Electronics for Saturn and Apollo: 11/1761
Apollo Lunar Experiments: 11/1791
Apollo News: 11/1792
Satellites in Orbit: 11/1800
Rocket and Satellite Launches: 12/1856
Gemini Programme Concluded: 12/1857
A Choice of Futures: 12/1875
Satellite View of the Moon and the Earth: 12/1922
Ground Systems for the Apollo Mission: 12/1926
Ten Years of Thor: 12/1940

10. Non-Electronic Equipment

The Air Conditioning System for the Concorde—H. W. Groves, D. J. Masters: 1/63
Equipment—Materials—Techniques: 2/224, 3/366, 6/926, 9/1370, 10/1558
Equipment display emphasises international co-operation: 7/1021
The British Aircraft Equipment Industry: 9/1303
Synthetic High Temperature Hydraulic Fluids for Supersonic Aircraft—J. S. McClure: 9/1400
Big Business for the Equipment Industry (Farnborough 1966): 11/1740
Airlift Cargo Handling: 12/1881
Quality Testing of New and Retreaded Aircraft Tyres—A. Heuberger, E. F. Schiantarelli: 12/1935

11. Airports and Airport Equipment

Airports and the Giant Jet: 6/855
Tomorrow it must be easier: 6/856
Europe's Modern Airports: 6/858
The Future of Britain's Airports—B.A.A.'s View—P. G. Masefield: 6/863
Tegel—Berlin's New Jet Airport: R. Grosch, H. J. Kranz: 6/871
Moscow Domodyedovo Airport: 6/874
Frankfurt Airport—Projects become Realities—K. Köhle: 7/1055
Fighting Aircraft Fires on Aerodromes: 7/1060
BALPA's 1966 Technical Symposium: 12/1838

12. Research and Technical

The Test Pilots Report on New Developments: 1/52
Sweden's Missile Test Range: 1/92
Recoverable High-Altitude Research Rockets from Dornier: 1/97
ATAs 1965 Engineering and Maintenance Conference: 2/217
Scramjet—A Supersonic Combustion Ramjet: 2/227
A Rotor/Wing High Speed VTOL Aircraft: 3/368
Twenty years' progress in aerodynamics and the changing shape of aeroplanes—D. Küchemann, J. A. Bagley: 4/487
The Northrop HL-10 Lifting Body: 4/529
The Transall goes into production: 9/1344
VC400—A German VTOL Transport Project: 10/1556
For high-altitude research . . .: 11/1793
Quality Testing of New and Retreaded Aircraft Tyres—A. Heuberger, E. F. Schiantarelli: 12/1935
The Role of Fluorocarbons in Airborne Wiring and Electronic Circuitry—A. J. Papayoannou: 12/1938

13. Industry

Concorde—From Project to Prototype: 1/48
The Corsair 2 Programme Accelerates: 1/89
Facing up to Facts: 2/165
Developing a Multi-mission Aircraft: 2/166
The Swedish Electronics Industry—D. Ebert: 3/329
Saturn 1B Testing Begins: 3/361
Germany's part in the ELDO programme: 3/364
The U.S. Aerospace Industry 1946-1966: 4/454
The Swiss Aircraft Industry: 4/500
West Germany's Aircraft Industry: 5/685
Space Activity in the German Federal Republic: 5/691
Italian Industry and Space Research: 5/703
Britain's Air Forces and Industry—D. Wood: 5/705
Progress with Concorde . . .: 5/773
The Italian Industry at the Turin International Exhibition: 6/876
Japan and its Aircraft Industry—C. E. Howard: 6/904
Japan in Space: 6/909
Boeing Plans 747 Production: 6/935
New European aircraft projects: 7/1016
Progress with the Concorde Project: 8/1167
A Conducted Tour of the French Industry—J. de Galard: 8/1172
Britain's Aerospace Industry in the Decade Ahead—D. Wood: 9/1291
The British Aircraft Equipment Industry: 9/1303
Rolls-Royce to take over Bristol Siddeley: 10/1442
Anglo-French Co-operation—R. Lucien: 11/1699
Farnborough '66—Can the progress be maintained?: 11/1727
Egypt's Aviation Industry: 11/1796
USIAS Report: 12/1858

14. Exhibitions, Congresses, Meetings

The Italian Industry at the Turin International Exhibition: 6/876
Hanover 1966—A European Air Show?: 7/1011
New European aircraft projects: 7/1016
Aero engines at the Show: 7/1018
Guided missile developments . . . and space research: 7/1020
Equipment display emphasises international co-operation: 7/1021
Aerospace Electronics: 7/1024
Around the Turin Air Show: 7/1088
Farnborough 1966—Towards a European aerospace industry: 10/1459
No basic decisions in Honolulu—IATA plays it safe: 11/1700
Madrid: The 17th IAF Congress: 11/1702
Farnborough '66—Can the progress be maintained?: 11/1727
New aircraft projects . . . and engine developments (Farnborough 1966): 11/1732
Tactical missiles for multiple missions (Farnborough 1966): 11/1733
Justified Optimism—Electronics at Farnborough: 11/1735
Big Business for the Equipment Industry (Farnborough 1966): 11/1740
BALPA's Technical Symposium: 12/1838
IATA's 22nd AGM: 12/1855

15. Miscellaneous

Interavia Air Letter reports . . . 1/19, 2/133, 3/265, 4/413, 5/647, 6/817, 7/973, 8/1119
Viewpoint: 1/30, 2/228, 3/284, 4/434, 5/668, 6/838 7/994, 9/1266, 10/1462
What's in the Air?: 1/100, 2/196, 3/340, 4/519, 5/776, 6/919, 7/1075, 8/1199, 9/1363, 10/1551, 11/1783, 12/1915
Readers' Letters: 1/105, 3/383, 4/530, 5/782
Books Received: 1/106, 2/228, 3/383, 4/530, 5/782, 6/935, 7/1089, 9/1402, 11/1803, 12/1941
Twenty Years of Topicality: 4/451
Sir Sydney Camm: 5/667
Future Military Use of Hovercraft—A. W. Buzzard: 5/750
The British Hovercraft Industry 1966: 9/1312
World Aerobatic Championships, 1966: 10/1553

16. Tables

The Airborne Com/Nav Equipment Market: 2/229, 3/376
European Radar Catalogue: 8/1209
Pillars of World Air Transport: 10/1505
Airborne Recording Systems: 10/1564
IATA Airlines Scheduled Traffic—Year 1965: 11/1799
Satellites in Orbit: 11/1800

17. Supplements

International Defense Review 5/1966

Winning the Obstacle Race—The Role of Air Cavalry in Vietnam: p. 569
Amphibious Warfare Today and Tomorrow: p. 574
The Tank Gun—Present and Future: p. 581
The AMX Tank Family: p. 584
Air Defence with the Vulcan Gun: p. 586
The Oeil Noir 1—An Anti-Aircraft Fire Control Radar: p. 587
Enemy Detection in the Field: p. 588
Modern Weapons of the Soviet Army: p. 590
H.M.S. Exmouth—The Royal Navy's First All-Gas Turbine Frigate: p. 594
The Royal Navy's New Guided Missile Destroyer: p. 596
H.M.S. Fearless: a Versatile Assault Ship: p. 601
A New Hydrofoil for the Royal Canadian Navy: p. 602
Action Data Automation: p. 604
Weapons—Vehicles—Equipment: p. 606
The S360/1 Electronic Velocity Analyser: p. 609
A New Concept for the Field Hospital: p. 610

International Defense Review 11/1966

Europe's Defence—the Dilemma in the Front Line: p. 1599
The Main Battle Tank 1975-80: p. 1605
Modern Weapons for the Soviet Forces: p. 1608
The General Sheridan enters service: p. 1613
U.S. Army Engineer Combat Vehicle Development: p. 1614
The Alvis Vehicle Range: p. 1618
New Corvettes by Vosper: p. 1620
U.S. Navy adds 50-foot aluminium craft to its Vietnam patrol fleet: p. 1623
The hydrofoil for anti-submarine warfare: p. 1624
Soviet Naval Parade: p. 1626
The Royal Navy—Carriers and After: p. 1628
Weapons—Vehicles—Equipment: p. 1635
The guided missile frigate Suffren: p. 1644
